Objectives: This class aims to introduce Pre-K children to the Chinese language. The emphasis will be on familiarizing students with speaking, writing and understanding Mandarin Chinese, as well as encouraging students to view learning Chinese as a fun experience. We will start with 30 of the most basic characters, then move on to 30 of the most commonly used words, and finally onto 20 common phrases. I will incorporate flash cards, illustrations, songs and games in addition to the textbook in order to make this a fun and special experience for everyone. I look forward to meeting and working with the children as well as the parents.

Textbook: Entry Level Chinese For Children (幼儿汉语)
